

Single Label Sticker Labeling Machine PSV-S101

Sticker labeling machine is able to label different containers of different materials (plastic, glass, metal etc.) and different shapes (round, oval, rectangle, flat, irregular etc.). PSV-S101 serious labeling machine is used for single side labeling or full-circle on round surface of different shape containers.

PACKSOUL Automatic sticker labeling system consists of main structure, product transmission belt with guide adjustment, label dispensing unit, label pressing system, motor, sensor, mains on/off, emergency switch, PLC & HMI.

Features

- High-level configuration of advanced PLC control system, check label length automatically to make sure the whole operation stable.
- Labeling with high positioning accuracy, stability, labeling smooth, not wrinkled, no bubbles.
- Easy operation with man-machine interface touch screen, with extensive help function and error display.
- Can be equipped on production line.

Technical Parameter

Model	PSV-S101
Labeling Speed	60-80 pcs/min
Labeling Accuracy	±1.0mm
Container Size	Φ20-100mm Height:30-260mm (Can be customized if exceed)
Label Size	Length :10-300mm, Height:10-140mm (Can be customized if exceed)
Label Roll Diameter	Inner : φ76 mm , Outer : φ350 mm
Machine Size	1800L*800W*1500H (mm)
Power	1.5 KW
Voltage	220V/50Hz
Air pressure	0.6Mpa
