

Hot Melt Wet Glue Labeling Machine

For product's individuation and competitiveness, the container needs various shape and labels. The automatic hot melt glue labeling machine fits various labeling product. The container is fed to carousel; The container is held top and bottom in the carousel during the label application process. The labeling is controlled by a continuous/automatic correcting system. The labeling is cut onto a drum provided with rotating blade and static blade which is simple and reliable to supply a correct cutting. The hot melt is spread on one edge of the labeling and the overlap on vacuum drum. The labeling process is complete in the labeling station in a short time.

Features:

- Siemens PLC controls
- Nordson hot melt glue system
- It is available to label various shape containers, especially square container
- The container and labeling changeovers are simple, easy to change and install

Technical parameter:

Item	Unit	Parameter	Item	Unit	Parameter
minimum length of label	mm	152	maximal length of label	mm	419
minimum width of label	mm	15	maximal width of label	mm	100
minimum diameter of bottle	mm	45	maximal diameter of bottle	mm	125
working air pressure	bar	04.июн	working air volume	L/min	80
maximal bottle size	L	2. 5	production capacity	bottles per hour	100-350 bottles per minute
					(for 500ml)
Machine Size	mm	4360×1620×1530 (adjustable)	Machine weight	kg	1800
(L*W*H)
