

AF 25T | Automatic Capsule Filling Machine

The AF Series is one of the most sophisticated automatic ranges of capsule machines. An intelligent and efficient machine range, the AF series is backed with the ACG guarantee of service, warranty and spares support.

One of the widely-selling machines from the range includes AF 25T. A compact and fully automatic capsule-filling machine, the AF 25T is capable of filling a large variety of powder formulations into hard capsules. With easy and quick capsule size and product changeover features, the AF 25T ensures minimum downtime and higher productivity. In addition, an easy-to-operate touch screen makes the machine operator-friendly. It also comes built with security features such as auto shutdown with audio-visual message display in case of malfunctions.

Features

- Output of up to 25,000 capsules per hour for powders
- High capsule filling accuracy due to precise slug dosing principle
- Better yield due to high filling accuracy and less powder wastage
- Fills powder/pellets/tablets/micro-tablets/capsule-in-capsule and other combinations
- Conforms with cGMP guidelines
- Can be integrated with Accura an online 100% checkweighers
