

## Automatic Powder Packing Machine

---

### Automatic powder filling production line

1. Automatic powder filling line including: unscramble bottle machine, automatic feeding machine to single head powder filling machine, screw cap machine (or can sealing machine) to bottle aluminum foil sealing machine, labeling machine to spurt the code machine, chain plate conveyor belt to the platform, using the can choose according to the requirement of the product line configuration;

### Technical parameters:

Filling range: 10-2000 g

Filling speed: 0-40 bottles/min

Accuracy of measurement: plus or minus 1%

Working voltage: 380V

Net weight: 1500kg

Machine size: LxWxH (6500 x 1500 \* 2200) mm
