

Vacuum Chamber - Dual Chamber Machine DZ600-2

This packager uses compound film bags to do vacuum hot-sealing packing for various foods, medicines, native products, aquatic products, chemical materials, hardwires and electronic components in the state of solid, power, paste or liquid, which can effectively prevent the packed goods from being rotten and gone bad caused by the oxidation of grease goods or the propagation of the bacterium found of oxygen, keep the quality, freshness, taste, color for of an extended storage and make it easy to transport and export the packed goods. It is widely used in factories, shopping malls, hospitals and scientific research departments.

Models	DZ600-2
Voltage	380-415V/50-60Hz 3phase
Power	3.2KW
Chamber size	670*625*150mm
Seal Bart	600*10mm
Vacuum Pump	40m ³ /h
Pressure	1.0KPa
Machinery size	1495*980*1100mm
N.Weight	380Kg
