

## *Candy Roll Wrapping Machine SGM-2000*

This candy roll wrapper machine apply to wrap candy with coincident shape, one set with several pieces cylindrical candy. Candy wrapped shape includes flat end and double twist.

### **Features:**

1. Frequency converter speeding control;
2. Automatic control of optoelectronic scanning inspection;
3. Automatic fault alarm system can display fault information & reasons and stop machine;
4. Automatic shake feeding system; automatic paper feeding system;
5. Automatic code printing system and realize both single-layer and double-layer packing.

### **Main components List:**

No.	Name	Brand	Oringin
1	Touch Screen	Siemens	Germany
2	PLC	Siemens	Germany
3	Frequency Converter	Delta	Taiwan
4	Electronic Thermometer	Delta	Taiwan
5	Stepping Motor	Kinco	Germany
6	Date Printer	Markem	USA
7	All electrical equipments use Schneider (France)		

All above components can be customized according to customer requirements.

**Technical Parameters:**

Packing Shape:	Cylindrical flat end & double twist
Candy dia.:	Φ17mm ~ Φ24mm
Packing Size:	Candy thickness: 6mm ~ 12m
Packing speed:	Flat end: 100-155sets/min; Double twist: 100-140sets/min
Power:	2.59kw
Voltage:	380V 50Hz ( It can be adjusted according to customer's requirements)
Driven Type:	Electric
Dimension(L*W*H):	5.9m * 1.65m * 1.75m
Packing Method:	Wooden Packing
Weight:	2150kg
Warranty:	12 months from the date of installtion
Certification:	CE
