

PET Can Carbonated Drinks Filling and Sealing Machine (Linear Type)

Small Capacity PET Can Filling Sealing Machine (Linear Type) is a straight linear line composed of automatic rinsing machine which included an automatic water spraying nozzle, automatic rotary filling machine and automatic rotary can sealing machine.

1. This filling machine is used for filling carbonated beverage in cans, such as beer, cola, energy drinks and soda water.
2. This beverage can filling machine can be used for different material of cans, such as plastic, iron, aluminum and so on, and the different size of cans is allowed. We can design the equipment according to your requirement.
3. This beverage can filling machine is applicable for equal pressure filler and capper of carbonated drinks in beer and drink industry.
4. The can filling machine is a pop canned beer in the digestion and absorption of advanced foreign and domestic sealing machine on the basis of independent development of the can filling, sealing unit.
5. Filling and sealing is the overall designed, power system by filling sealing system to Ensure that both the absolute synchronization and coordination.
6. Beverage can filling machine adopts the advanced machine, electrical equipment, and Pneumatic control technology.
7. The beverage can filling machine has the characteristics of filling reposefully, high speed, liquid level control, capping reliably, frequency conversion timing, less material loss.

Features:

1. The filling amount is rather average, convenient adjustment.
2. Main frame adopts SUS304, the parts contact with liquid adopts SUS316.
3. It adopts special filling valve which makes washing and cleaning more convenient.

Technical Parameters:

Model	Unit	CGJ-50	DGC-12/16	YLG-40
Capacity	Cans/h	3000	1500-3500	2400
Power	KW	0.55	0.75	0.75
Dimension	mm	1900*530*1100	810*1050*2050	930*700&1850
Weight	KG	480	500	500
