

Professional Design Hard Candy Die-forming Machine - DRYT-500

Hard candy making machine can produce not only transparent candy, fruit candy, jam filled candy, power filled candy, but also twin colors & twin flavor candy, stripe candy and coffee candy.

Constructure: It gathers machine and electric all in one. Consisting with auto-weighing dissolving system, microfilm cooker or microfilm rotary cooker, cooling table table, batch roller, rope sizer, forming machine and cooling tunnel machine with high automation, higher output.

Advantage: The produced candy which made from this machine have transparent and smooth surface and good taste, good looking of candies.

Specification:

Production capacity	400-500kg/h	Drum running speed	0~20r/min
Gross weight of hard candies	3~7g	Steam consumption	400kg/h
Steam pressure	0.2~0.6Mpa	Electric power	22kW/380V
Room temperature	20~25°C	Humidity	55%
Length of the whole line	12m	Gross weight	Approx.5000Kgs
