

XLRCGS-2 2 Cavity Semi Automatic Rotary PET Plastic Bottle Blowing Machine

The 1000BPH 20L Blowing Machine ensures that there is no hidden danger of personal injury, which avoids the danger of semi-automatic manual bottle extraction, reduces the loss caused by accidents, and improves production efficiency. Due to the high and reliable performance, it can be operated by a single person or multiple machines at the same time. Imported touch-screen man-machine interface computer is adopted, with precise performance, fast speed and strong stability. The structure is simple, the oven is integrated with the slide way in the main body, and the maintenance is convenient.

The detection element of our 1000BPH 20L Blowing Machine is selected, and the strong power control is selected from imported famous products with reliable performance and accurate response. The infrared lamp tube heating, strong penetration and uniform heating can be adjusted, which can be suitable for heating preforms of different structures.

Technical Parameters:

Model	XLRCGS-2	
Theoretical output	1000-1500 pcs/h	
Finished bottle	Max. bottle volume	20L
	Max. neck diameter	38mm(Φ20 ~ Φ55)
	Max. bottle height	1000mm
Mold specifications	Cavity	2 cavity
Electrical system	Power voltage	380v/3Phase/50HZ
	Installation power	196 kw
	Actual power consumption	190kw
Air source	Recommend air compressor	8m ³ /min 30Kg
Cooling water	Recommend water chiller	10HP
Blower size	Length*width*height/weight	3640mm×3080mm×3600mm/1460k
		(2 sets)
