

Drip Coffee Bag Packing Machine (Only drip bag)

1. It's suitable for packing drip coffee bag, dip coffee bag, tea bag...etc.
2. Ultrasonic sealing and cutting system is safe, efficient and eco-friendly. The machine is controlled by PLC, with the function of overload and warning alarms.
3. The touch panel provides comprehensive setting function. The operator can adjust the parameters according to individual demand. ACMA provides the flexibility.
4. It's easy and efficient to use quickly-clean device to discharge the ingredient.
5. All the routes contacted with ingredient are made by stainless steel.
6. With slide doser weighing system, you can adjust the volume to change the filling weight.
7. Suitable filter: drip coffee bag, non-woven, PET mesh, ultrasound-sealable materials.

Specification:

- Packing Capacity: Max. 60 bag/min, might be different according to different spec.
- Packing material: dip coffee filter, non-woven, PET mesh, PLA...etc.
- Packing method: Ultrasonic sealing and cutting.
- Bag size: 74mm x 90mm
- Weighing system: slide doser
- Weighing range: 13cc-63cc
- Power: AC220V, 50/60Hz, 3P, 3.0KW.
- Air pressure: 5Kg/cm² (0.5MPa)
- Machine dimension : 1100mm(L)x750mm(W)x2165mm(H)
- Machine weight: 320Kg
