

## *Small Bottles Sleeve And Shrinking Machine*

Automatic bottle shrink wrapping machine is suitable for wrapping of such products as pop-top, mineral water, bottles, beer, drinks etc without bottom tray, working with PE film shrink tunnel to pack the goods perfectly, the whole production process adopts the Germany advanced techniques, and the main parts are imported from international famous companies, Capacity stable and using long-time, it consists of motor, through cooperation with motor to form the product packed with plastic film and several bottles as a group come out from the hot shrinking packing machine

### **Technical parameters:**

- Capacity: 0-20000 bottles/hour(on the base label length:500ml)
- Label size: Diameter 30-125mm
- Bottle diameter: Diameter 28-125mm
- Label sleeve length: 30-250mm
- Thickness: 0.035mm
- Label material: PVC/ PET
- Electrical power: 2.5KW (380V 50HZ)
- Overall diameter: 2440\*890\*2200mm
- Weight: Approximate 750KG
