## *3-in-1 Bottled Water Filling Machine*

3-in-1 water filling machine can be used to fill water in bottles made of polyester or glass. The cap could be normal plastic cap, sports cap, aluminum cap and others.

- Filling medium: mineral water, pure water, drinking water, mountain spring water, etc
- Capacity: 4000~40000bph
- Bottle size: 200ml to 2L

### **Features:**

1. Rotary rinse is suitable for all kinds of bottle type. The water filling machine is position type spray. Bottle type replacement and lifting are easy to adjust.
2. Water filling method is gravity filling, the whole process is automatic, and using advanced Omron or Siemens PLC control equipment.
3. Advanced automatic capping system, magnetic clutch and capper, adjustable torque, ensures the quality of capping.
