

KFZ-1 Coffee Capsule Powder Filling Machine

This machine is designed for coffee powder products (or other types of powder products such as cocoa powder, milk powder, etc.) to be filled and sealed in empty plastic nespresso capsules. It is characterized by compact structure, high degree of automation, easy to use, stable performance, simple maintenance, high production efficiency, 24 hours continuous work.

Features:

1. Stable performance, high configuration Eurpe standard.
2. One-click operation, real-time monitoring.
3. Servo drive and high-precision high-speed positioning movement.
4. Protect the acrylic dust cover.
5. High cumulative filling performance of servo motor, less than ± 0.1 grams.
6. High performance nitrogen flush, the percentage of nitrogen in the sealed capsule exceeds 95-98%.
7. Full set of Ormon control system, network system can achieve cross-regional and supranational monitoring.
8. All parts in contact with ground coffee are made of SUS304.
9. All welded and polished hopper, easy to clean.
10. No capsule unfilled detector, no cap alarm detector, cylinder return position detector.
11. The fault is automatically displayed on the man-machine interface.

Product Parameter

Model	KFZ-1
Filling Head	1
Productive Capacity	3000 cups/hour
Filling Capacity	1-30 (adjustable)
Power	2.5KW
Voltage	380V 50HZ
Weight	800 KG
Dimension	1300mm * 1200mm * 2000mm
