

YB-BF Semi-Automatic Powder Filling Machine

This machine is suitable for measuring and filling powder products, such as flour, milk powder, starch, coffee powder, pepper, curry powder, protein powder, spices, Chinese medicine powder, etc.

Performance features:

1. There is no restriction on the packing container, and the foot switch controls the blanking.
2. The screw metering method has high precision and strong stability.
3. The machine has simple structure, convenient maintenance and low failure rate.
4. The machine can work alone or with the hoist.
5. The machine shell and material contact part are made of 304 stainless steel.

Technical parameter:

Model	YB-BF
Packing speed	5-30 bags/min
Packing range	10g-3000g
	(need to change auger accordingly)
Filling accuracy	≤ ±1%
Power	250 W
Power supply	1ph AC220V, 50/60Hz
Net weight	150kg
Machine dimension	L680 × W650 × H1500mm
