

## *CC Cream Filling Machine CM-CCFM*

The machine is specially designed for fluid liquid CC cream filling. It is specially designed for filling air cushion BB/CC cream products, easy to operate and clean. The main part of the machine is made of stainless steel, which is easy to clean and corrosion resistant. The main electrical uses Siemens, Schneider, Omron; The gas path uses Airtac. The mechanism is compact structure, small occupation, and high efficiency, stable and reliable.

### **Optional mechanism**

Automatic bottle feeding system, automatic capping system. Container discharging are controlled by cylinder mechanical, and the detection sensor is OMRON optical fiber sensor.

### **Optional configuration**

Auto container collating, Auto container feeding, Auto swab refill feeding, Auto cap feeding.

## Features

- Tank in 15L is made of SUS304 sanitary materials.
- Filling and lifting adopt servo motor driven, convenient operation and precise dosing.
- 4pcs/fill in one time.
- PLC and touch screen adopts Schneider brand.
- Powder case size at 60mm (Can be customized according to customer's requirements)

**Note:** Due to different parameters of products, the productivity of equipment will change accordingly.

## Technical Parameters:

Outer dimension	1150*750*1650mm
Voltage	1Φ AC220V 50/60HZ
Power	1KW
Air pressure	0.5-0.6Mpa
Filling volume	0-20ml
Capacity	20-30pcs/min
