

HZTBY-D Automatic Linear Capping Machine

Automatic capping machine is mainly suitable for different material specifications and different specifications of the cover, spin (rolling) cover. Suitable for screw cover, anti-theft cover, child proof cover, press in cover, etc.. Preparation of constant torque capping head, the pressure can be easily adjusted. Compact and reasonable structure, can be easily linked with other equipment into line, dust-proof cover can be purchased.

Functions:

Applicable to all kinds of cosmetics, medicine, veterinary drugs, pesticides, lubricating oil industry capping machine equipment.

Machine advantages:

1. Straight line design, composed of convenient and beautiful lines.
2. Host speed using imported inverter, stepless speed regulation.
3. The strong electromagnetic left-hand cover torque converter, completely solve the traditional mechanical friction plate in the rotary cover spurts ills.

This machine can be designed according to the special requirements of customers.

Technical Parameters:

Model	HZTBY-D
Voltage	AC220V
Power	500W
Production speed	30-40pcs/min
Air pressure	0.4-0.6mpa
Applicable seal	15-70mm
Bottle diameter	50-280mm
Machine weight	110kg
Machine size	900*470*1240mm
Note: This machine can according to the customer special request quantity
