

## *XT-CW Automatic Rotary Capping Machine*

XT-CW full-automatic cap-screwing machine adopts vibrating cap-arranging and draw-to-take cap-feeding design. Caps will be nested into cap-screwing head firstly and then screwed onto containers, ensuring qualified rate. It is applicable to plastic threaded caps, aluminum caps and press-in caps with replacing different cap screwing mechanism. Design of this machine has features of flexible replace ability and simple operation, which is easy to replace different containers. It can be used independently or matched to production line. General chemical industry, medicine, food, cosmetic, cleaning supplies, etc. is applicable.

### **Features:**

- No bottle will not put the cap on the bottle
- No cap will not screwing
- Open the cover then machine will be alarm and stop.
- Servo motor use for the cap sealing. The capping torque can be adjust it by HIM. Insure the sealing well.

### **Technical Parameters:**

Applicable bottle height	30-150mm
Applicable bottle diameter	Φ20—120mm
Bottle cap specifications	Φ25-100mm
Production capacity	20-60 bottles/ min
Air source pressure	0.5~0.7 MPa
Power supply	220V、50HZ
Output power	3KW
Weight	800kg (About )
Boundary size	2100×1500×2000mm
