

SYM-10 Automatic Heating Contractive Packing Machine

SYM-10 Automatic Heating Contractive Packing Machine - thermal shrinking packaging machine. This machine is mainly used for food, daily use chemicals, medicine and other light industrial products. Taking advantage of the shrinkage properties of shrinkable film, after the packaged goods are wrapped, they are fused with the film and then tight packaging is realized through oven. In this case, it is convenient to start sleeve packaging.

This machine mainly consists of electric appliance, pneumatic system, frame part, middle transitional device, oven part and feeding part (this part can be specially designed and manufactured based on customers' different forms of packaging articles and various requirements).

Technical Parameters:

Model	SYM-10
Production Capacity	5-15 boxes/min
Box Size	(150-250)*120*100 mm
Compressed Air	0.6-0.8 Mpa
Power	380V,50Hz,6Kw
Packing Size	2500*1200*1600 mm
Packing Weight	650 Kg
