

RZ8-S95-12ZK High Speed Rotary Vacuum Packaging Machine

The RZ8-S95-12ZK High Speed Rotary Vacuum Packaging Machine is a powerful and versatile tool for businesses looking to package their products with maximum efficiency and quality. This state-of-the-art machine features a range of advanced features that make it ideal for use in a wide range of industries and applications. The RZ8-S95-12ZK High Speed Rotary Vacuum Packaging Machine is the ideal solution for businesses that require precise and efficient vacuum packaging.

Description

The core of RZ8-S95-12ZK high-speed rotary vacuum packaging machine

At the heart of the RZ8-S95-12ZK High Speed Rotary Vacuum Packaging Machine is a powerful vacuum system that can create a vacuum effect of up to 2mbar, ensuring that products are fully sealed and protected from air and moisture. With 12 vacuum chambers, this machine is capable of processing large volumes of products quickly and efficiently, making it a popular choice for manufacturers and processors in a variety of industries.

Advantages of RZ8-S95-12ZK high speed rotary vacuum packaging machine

One of the key advantages of the RZ8-S95-12ZK High Speed Rotary Vacuum Packaging Machine is its ease of use and maintenance. The machine features a user-friendly touch screen interface that allows operators to easily control and adjust settings to meet their specific needs. The bag feeding mechanism is also optimized for improved performance and convenience, with a double fulcrum arm design that eliminates the need for a timing belt and ensures a stable, reliable feed.

Other advanced features of the RZ8-S95-12ZK High Speed Rotary Vacuum Packaging Machine include an automatic oil lubrication system that keeps the machine running smoothly and efficiently, as well as an independent closing function for each vacuum chamber that allows the machine to continue operating even if one of the chambers is malfunctioning. These improvements make the RZ8-S95-12ZK High Speed Rotary Vacuum Packaging Machine a durable and reliable choice for businesses seeking consistent, high-quality vacuum packaging.

Overall, the RZ8-S95-12ZK High Speed Rotary Vacuum Packaging Machine is a top-of-the-line choice for businesses looking to streamline their packaging operations and improve product quality. With its advanced features, ease of use, and reliable performance, this machine is a valuable investment for businesses in a wide range of industries, from food and beverage to pharmaceuticals and beyond.

Main Specification

Models	RZ8-S95-12ZK (Double Bag) High Speed Rotary Vacuum Packaging Machine
Stations	8 stations, 12 vacuum chambers
Bag Width Range	60-95mm
Bag Length Range	100-190mm, Thickness \leq 50mm
Filling Range	\leq 200 g
Max Speed (depends on the bag and product)	\leq 150 bags/min
Machine Weight	5000 kg
Machine Dimensions(L*W*H)mm	3340* 2130 * 1800 mm
Total Power	9.49 kw
Driving Power	380 V three-phase five-wire 50 HZ(other power supply can be customized)
Compress air requirement	\geq 0.5 m ³ /min
