

NJP-2000/2300C Automatic Capsule Filling Machine (Groove Wheel, Push-button, touch Screen)

Feature:

1. Improves the module turntable the internal structure, Using the Japan imported linear bearing, ensure equipment's accuracy and service life.
2. Main transmission shafts bearing block can splits, easy for maintained and fix. Groove wheel dividing mechanism, accurate indexing, long service life.
3. All drive cam is using high quality material to made into indentations cam, resist abrasion, steading working, long service life.
4. High-precision drive system is stable and reliable
5. Electronic control system using Japan mitsubishi inverter driving, stepless speed regulation Japan mitsubishi PLC program control, accurate action. Safe and reliable, at the same time having feeding, automatic feeding two functions optional.

Technical Parameter

Model	NJP-2000C	2300C
Production efficiency	2000 caps/M	2300 caps/M
	12,000 caps/H	13,800 caps/H
Hole number	16	18
Index table	12 partition seal type	
Capsule size	00# 0# 1# 2# 3# 4#5#	
Capsule size for pellet	0# 1# 2# 3# 4#	
Total power	5.85kw	
Weight formain machine	1890kg	
Dimension main machine	1254×1014×2027mm	
Vacuum pump	1.5kw water ring pump
