

ZL780 Automatic Fresh Salad Weighing Filling Packaging Machine

This unit machine is special design for packaging various vegetable like White radish, cucumber, lettuce, cabbage in to plastic bag. The whole machine have the function of automatic product feeding, weighing, film bag forming, bag sealing, Including date coding, bag counting. The finished bag is output from conveyor machine which no need manual collect the bag and avoid the bag polluting.

Application:

It is suitable for quantitative weighing of large target weight or large volume materials such as vegetable salad, fruit salad, potatoes, onions, tomatoes, cherry tomatoes and other vegetables and fruits.

Features:

- Special load cell with high precision and high standard.
- Program recovery function can reduce operation failures, support multi-segment weight calibration.
- No products auto pause function can improve weighing stability and accuracy.
- Linear amplitude can be adjusted independently, can make the feeding more uniform.
- 15 languages available for global markets.
- 100 programs capacity can meet various weighing requirement, user-friendly help menu in touch screen contributes to easy operation.

Technical Parameters:

Model	ZL780
Forming bag type	Pillow bag/gusseted bag
Bag length	150-480mm by secondary film pulling the bag length can be longer
Bag width	120-375mm(Side width +front width)
Film width	≤780mm
Bag forming speed	5-15bag/min
Air source consumption	0.8MPa 0.45m ³ /min
Max outer diameter of reel	Φ 400mm
Core inner dia	Φ 75mm
Power	6KW 380V±10% 50Hz
Machine size	1650*1500*1750mm
Machine weight	650kg
