

GPP-50C Automatic Folding and Strapping Machine

The automatic folding and strapping machine GPP-50C is a kind of packaging machine that integrates automatic sealing and bundling, and can be used with automatic packaging line. It realize automatic folding cover, upper and lower sealing tape, multi-bundling. This machine works efficiently, and can meet the needs of new and old customers.

FEATURES

- Sealing and bundling are carried out at the same time. It is not only fast, but also efficient and small.
- This machine adopts PLC automatic program control, which is easy to operate and has low failure rate.
- Using photoelectricity to detect the binding position of the carton, one to three automatic bundling processes can be realized
- All actions are done automatically, reaching unmanned packaging
- It can be used in stand-alone operation, and can also be used with automatic packaging line

SPECIFICATIONS

MODEL	GPP-50C
Packing speed	18M/min
Carton Size	L200-600×W150-500×H150-500mm
Power Supply	380V 50/60Hz 3Phaze
Power	1500W
Adhesive Tape Width	55-72mm
Air Consumption	50NL/min

Air Compressing	0.6Mpa
Table Height	720-900mm
Machine Dimension	L2460×W1420×H1650mm
Machine Weight	260KG
