

## ***Powder Pouch Packing Machine / Detergent Powder Packing Machine GDS100A***

Our powder packaging machine it is suitable for automatic pack flour, salt, sugar, baking mixes, spices and ground coffee etc. From premade pouch filling to vertical form fill and seal bagging. Our packaging machines can handle all your free-flowing and non-free-flowing powders.

### **Main characteristics & Structure features**

- According to the characteristics of the product, the movement of each part of the device can be quickly adjusted in the man-machine interface. After adjustment and saving, it can be stored in the formula and invoked with one key.
- According to the change of packaging speed, the parameters such as feeding bag and suction bag are automatically adjusted, without manual debugging, the machine can run stably
- The torque output of each component can be monitored in real time, and the fault point can be quickly checked by automatic detection and alarm when the abnormal torque of the component is too large
- The sealing stuffing material is automatically detected and identified by the torque output of the servo motor and then eliminated.

## Specification

<b>Model</b>	<b>GDS100A</b>
Packing speed	0-90 bags/min
Bag size	L≤350mm W 80-210mm
Packing type	Premade bag (flat bag, doypack, zipper bag, hand bag, M bag and other irregular bag)
Air consumption	6kg/cm <sup>2</sup> 0.4m <sup>3</sup> /min
Packing material	Single PE, PE complex film, paper film and other complex film
Machine weight	700kg
Power supply	380V Total power: 8.5kw
Machine size	1950*1400*1520mm
