

WD-250 Automatic L Type PE film Shrink Wrapping Machine

Our PE Film Shrink Wrapping Packing machine is used in the combination package of mineral water, beverage, beer, liquid, infusion bottle and so on.

The linear bottle feeding method has small space occupation, convenient layout, stable conveying and high efficiency; the sealing adopts the advanced structure of heat sealing and eagerness, the sealing is firm, the edges are neat, the stitching performance is good, and there is no flash.

In today's fast-paced manufacturing and packaging environment, efficiency and reliability are critical. The company continually seeks innovative solutions to streamline operations while ensuring product integrity. The automatic linear PE film shrink packaging machine is a game changer in packaging technology. This state-of-the-art machine is designed to meet the diverse needs of industries ranging from food and beverages to pharmaceuticals and consumer goods.

What is a fully automatic linear PE film shrink packaging machine?

The automatic linear PE film shrink packaging machine is an advanced packaging solution that securely packages products using polyethylene (PE) film. The machine is designed for high-speed operation, helping companies significantly increase packaging output without compromising quality. With its automatic linear design, it ensures seamless flow of product during packaging and is ideal for high-volume production lines.

Key Features and Benefits

High efficiency: The automatic linear PE film shrink packaging machine can package multiple products at the same time, greatly shortening the packaging time. Its advanced technology allows for quick adjustments and minimal downtime, keeping your production line running smoothly.

Widely used: This machine is suitable for various products, including boxes, bottles, jars, etc. Whether you're packaging food, electronics or household items, automatic linear PE film shrink packaging machines can handle it all with ease.

User-friendly interface: The machine is designed with the operator's needs in mind and is equipped with an intuitive control panel that simplifies the packaging process. Operators can easily set parameters, monitor performance and make adjustments as needed, increasing overall productivity.

Durable Structure: The automatic linear PE film shrink packaging machine is made of high-quality materials and can withstand the rigors of daily use. Its sturdy construction ensures longevity and reliability, making it a worthwhile investment for any business.

Cost-Effective Solution: By automating the shrink wrapping process, companies can reduce labor costs and minimize material waste. Efficient use of PE film not only reduces packaging expenses, but also contributes to a more sustainable operation.

Enhanced Product Protection: The shrink wrapping process provides a tight seal for the product, protecting it from dust, moisture, and damage during storage and transportation. This extra layer of protection helps maintain product quality and extend shelf life.

Technical Data

Model	WD-150	WD-250
Overall Dimensions L*W*H(mm)	5050*3300*2100	12000*1000*2100
Weight of Machine(KG)	1200	2500
Heat Shrinkable Furnace Size L*W*H(mm)	3700*920*1750	2500*750*2100
Maxmum Size L*W*H(mm)	600*400*350	800*650*450
Packing Speed(b/m)	08.окт	16-20
Width of Conveyer Belt(mm)	920	541
Working Power	380V 20KW	380V 30KW
Working Pressure(Mpa)	0.6-0.8	0.6-0.8
Machine Power(KW)	20	30
