

## Cap clamping machine ASP-120

The machine is a vertical lid-tightened researched and manufactured by our company. Its features:

1. After the aluminum foil is sealed, because of the lid heating relax, and again tighten once the lid, ensuring the lid-revolving acceptance rate.
2. The machine may used in the special lid-revolving, for example, the irregular lid with spray nozzle and high lid, it is a multifunctional lid-revolver. It suits for the lid-revolving of all kinds of bottle shape for foodstuff, pharmacy, daily chemicals, pesticide, chemical industry and detergent.

### Technical specifications:

	<b>ASP-120</b>
Total power (V/Hz)	AC 220/50 110/60
Power (W)	1000
Bottle height (mm)	30-300
Lid sizes (mm)	15-17
Bottle diameter (mm)	35-140
Production capacity (bottles/hour)	≤2000 (bottles/hour)
Contour Sizes (L×W×H) (mm)	2000x600x1200
Weight (kg)	280
