

## Auto Sleeving Machine DSV-450P

### MACHINE FEATURES

- 1.Can be fully integrated within production line.
- 2.The double label holders feed the labels alternately thereby reducing the time for changing the labels and enforcing operation convenience.Optional 45 degree ground label unwinder is available.
- 3.Specially designed cutter plate does not need changing within rated specifications. If needed,knife plate change-over can be performed under 3 minutes.
- 4.Forceful insertion designs could lower producing cost for you.
- 5.Integrated adjustment design for the entire transmission maximizes versatility for accommodating different label specifications.
- 6.Accommodates film paper core size to 5-10 with variable adjustments.
- 7.PLC(Programmable Logic Control) for increased accuracy and speed over conventional controls.

### Specification

Max speed	450BPM。
Bottle Diameters	φ25mm~φ125mm。
Film Material	PVC /PET /OPS。
Film Width	PVC: 0.035mm~0.08mm, PET: 0.04mm~0.06mm,OPS: 0.04mm~0.06mm 。
Machine Size	1090mm*1130mm*3064mm(L*W*H)。
Voltage	Power source:3P;220V,380V,440V(Choose one from the given selection)。
