

Vibration Feeder Equipment SP-Z01

The product description:

The vibration feeder is used to continuously transport the aggregated bulk material from the hopper to the hoister. The product is used the principle of electromagnetic vibration, the material is continuous vibrated to the hoist hopper, to achieve automatic feeding. The machine has a durable, low noise, free maintenance features.

The technical parameters:

Hopper capacity 150Liters
Delivery capacity 3-7M³ / h
Voltage single-phase AC 220V; 50Hz
Power 0.3KW
Machine weight 150KG
Packing size 1350mm (L) * 900mm (W) * 720mm (H)
