

## *Cold Glue Labeling Machine ZD Series*

ZD Series Rotary cold glue labelers, with advance technology and stable performance, have been produced for ten years in our company. With the most up-to-date system of controlling and transporting, the labeler is very accurate and reliable to apply label on containers. Rotary cold glue labeler has occupied large shares in China market, enjoy high reputation in the same industry and achieve remarkable success in China. At the present time, the company has finished module design for cold glue machine and can meet customers' different needs quickly. This machine suit for different industries for cylindrical, square and shaped containers for brewage, distilled spirit, wines, soft drinks, seasonings, cosmetics, detergents and others.

Number of Heads: 6,9,12,15,18,24,30,36,45 Design base on the customers' requirements.

Capacity: 3000-60,000 b/h.

Limit Capacity: 110-120%.

Pattern of Container: 50-120mm for cylindrical and square and can apply label for fixed position.

Pattern of Label: Height is 200mm. length is 120mm.

Label Consumption: <1%.

Machine with Conveyor Belt: 1900-4510mm. (including motor)

Number of Applying Label at the Same Time: 4.

Label Pattern: Body, back, neck, ring aluminum label and aluminum label for sealing top. (Special requirement for information).

Voltage: 380±10%V 50Hz.

Air pressure: 0.6MPa.
