

Induction Cap Sealing / Model: IGNITE-I AIR

We manufacture a wide range of Induction Cap-Sealing Machine (IGNITE –I AIR) that is specifically designed with an Induction generator and coil mounted on a mobile frame. The IGNITE digital technology decreases internal components, reduces energy consumption and lessens the overall footprint and weight of the machine, ultimately lowering the cost of ownership while proving our commitment to a greener, more sustainable future. Universal coils seal standard flat or CRC caps from 15-120mm.

Features:

- Less Power Required
- Fault Indicator
- Safety and Protection Alarms
- Compact Air-cooled Design
- Membrane Control Panel

Supplies:	200-240V, Single-phase (50/60Hz)
Output Power:	1Kw/IGNITE 1000
Net Wt./Packed Wt:	60Kg-140LBS
Dimension (WxDxH)	65(H)x26(W)x26.5(L)
Cap size:	20mm to 120mm
Max. Line Speed:	38 feet/minute
