

Dual-Head Automatic Shrink Sleeve Labeling Machine ESM-600HD/800HD

- Containing all the characteristics of high-speed shrink sleeve labeling machines.
- Dual heads can effectively reduce equipment load factor for maintaining production quality stability for a long time and the number of production target yield rate.
- Second head will take over first head's job for maintaining 600BPM when first head's film is used up. Machine is much applicable to non-stop production line with output pressure.
- Detached HMI control box features bevel and ergonomic designed touch screen.
- Dual-head machine saves more spaces than two single-head machine and effectively shares production pressure. Particularly suitable for long-running of production line.

600 BPM Per Head / 800 BPM Per Head

Host Dimension	L1150mm*W1200mm*H2300mm
Power Consumption	12KW Approx.
