

DXD-500/800F Automatic Powder Packing Machine

The machine is designed and manufactured specially for powdery and super fine powdery products. Driven by servomotor, the auger is rotating to fill products; furthermore, the filling range can be adjusted automatically through computer. The processes of bag making, measuring, filling, sealing, cutting, counting and hot pressing codes can be done automatically. Packing material include several kinds of heat-seal lamination, such as PET/AL/PE, PET/PE, NYLON etc.

FEATURE

1. The machine used good quality SS304 stainless steel cover meets to GMP standard.
2. Equipped with antipollution and dust proof device.
3. Automatic adjustment of pouch size and filling range.
4. Photocell controller is easy to manipulate.
5. The horizontal sealing uses high temperature resistant bearing which will ensure the continuous operation of the machine without filling the oil regularly.
