

Full Automatic Pharmaceutical / Cosmetic Filling Machine

Sanitary grade semi-automatic show gel filling machine piston is suitable to fill the honey materials with high viscosity and poor flow ability. It does the filling pneumatically, its hopper and the cylinder both are thermally preserved with electrically heated circulation water. The hopper is equipped with a frame mixing system. The machine is easy to clean and operate. Confirming to GMP standard.

This series filling machine is foreign advanced filling machine technology transformation and innovative products, its structure is simple and reasonable precision, easy to operate, user-friendly design more in line with the requirements of the modern enterprise. Widely used in pharmaceutical, cosmetic, food, pesticides and special industries, is a high-viscosity fluid, paste quantitative filling the ideal equipment

Main Features:

1. Simple structure, convenient maintenance, reliable drive.
2. Imported cylinder and pneumatic components, guarantee the reliability of the machine.
3. High measurement accuracy, no drip phenomenon.
4. Filling speed, can automatic uninterrupted filling.
5. Adopt imported 316L stainless steel materials, inside and outside polishing, conforming to GMP standards.
6. Feeding style: Normal gravity type.
7. Control mode: Full pneumatic control.

Parameter:

Model	UI 8
Voltage supply	220/110V 50/60Hz
Power	10W
Filling accuracy	$\leq \pm 1\%$
Filling speed	About 4-60Bottles/min(take water for example)
Filling volume	10-100/10-200/30-300/50-500/100-1000/50-2500/1000-5000ml
Equipped with air pressure	0.4-0.6 MPa
Size of air compressor connector	OD 8mm
