

PTP60 High Speed Effervescent Tablet Into Tube Filling Machine

This machine is specially designed for effervescent tablet counting and tube bottle filling. It adopts horizontal push filling and can fill multy lanes at one time. Thus, it is the fastest tube filling machine in China. It comply with GMP requirement. It is widely used in foodstuff, pharmaceutical, chemical industries etc. Tablets arrangement is made by vibration and counting, filling are controlled by PLC. When the effervescent tablet fall into the tube, it rotate with high speed to make it fall horizontally one by one and accuracy reaches 99%.

Structure of the machine: Tube bottle auto-feeding, auto- counting and auto-capping. It is simple to operate and maintenance.

Main Parameters:

1. Capacity: 60-80 tubes/Min.
2. Accuracy: > 99%
3. Suitable for: Tube bottle
4. Capping accuracy: >99%
5. Filling Mode: Continuous pulling
6. Air source: Provided by Buyer
7. Power: 1100w mono-phase 220V
8. Dimension: 3400mm(L)*1700mm(W)*1800mm(L)
