

Rotary Powder Spices Filling Machine FDT-01

Applies the latest technology, meet with the latest national GMP standards. Reasonable design, simpler and stronger. It can automatically complete the measuring and filling, suitable for packaging powdery products such as medicine powder, milk powder, protein powder, chicken powder etc.

Features

1. Using chuck type positioning mechanism, multi language LCD touch screen, PLC control system, the working mode is clear at a glance.
2. The use of cans or bottle-shaped containers, no filling without bottles or lack of bottles, can be equipped with an automatic bottle feeder.
3. Simple structure, and easy and convenient to clean.
4. Imported servo motor, with fast speed and large torque, which greatly improves the packaging accuracy.
5. The material level is automatically controlled, and the lack of material is automatically supplemented, saving time and effort
6. The same machine can meet the different packing specifications by replace screw parts.

Technical Data

Model	AT-FDT-01
Filling range	1-2000g
Measurement error ($\geq 100g$)	$\pm 1\%$
Filling speed	0-60times/min
Liftable head	with
Pedestal structure	with
Frame structure	No
Weight	550KG
Dimensions (cm)	(L)200×(W)100×(H)210
Power supply	AC380V50HZ• 2.5KW
