

DK-FJ500 Side and Corner Case Sealing Machine

Features:

Automatic folding cover, to receive adjust the width, height. Carton suitable for pipeline operations, a complete sealing lid off the box, and can use online with strapping, automatic strapping two bands operate without human intervention, automation strong, at around two conveyor drive

1. This equipment line or stand-alone operation, automatic folding cover, along with the upper and lower intermediate rubber sealing, once completed
2. Precision fit with another solid performance, smooth operation, long life and good stability
3. Standard equipment specifications, according to the need for equipment to widen, heightening custom
4. Standard table height is 670 mm (other requirements can be customized)
5. The use of advanced technology manufacturing, durable structure

Technical Parameters:

DK-FJ500 Side and Corner Case Sealing Machine/Carton Case Sealer	
Applicable carton size	150-500mm(L)*120-500mm(W)*150-500mm(H)
Conveying speed	20 m / min
Equipment size	2060mm(L)*980mm(W)*1520mm(H)
Power supply	220/380V 50Hz(Alternative use)
Maximum power consumption	0.4kw
Apply pressure	6kgf/cm ²
Tape width	48/60/75mm(Alternative use)
Equipment weight	236kg
