

YG-260 Pail Cap Roller Type Automatic Capping Machine

YG-260 roller type capping machine mainly adopts the mode of manual cap placement and automatic cap pressing. Automatic capping can be effectively carried out through roller conveying (Two belts clamp the pail, top roller press the cap).

Technical Parameters:

Speed	<p>≤500 pails/hour</p> <p>*The actual production capacity changes according to the product size, packaging material and material characteristics.</p>
Pail size	Φ200-300mm
Power	~220V 50Hz/1KW
Machine size	2000×800×1500mm(L×W×H)
Machine weight	Around 150Kg
