

NJP-3200 Automatic Capsule Filling Machine

NJP-3200 automatic filling machine is newly designed and developed independently by our company, on the basis of original technology and advantages of similar products all over the world. It is characterized by large output, accurate filling volume, good adaptability to medicine and empty capsules, stable operation and high automation. Therefore, it is an equipment for mass production.

Technical Parameter:

Model	NJP-3200
Filling material	Powder & granule
Quantity of mold holes	27
Capsule size	00#-4#
Largest output	3200pcs/min
Power supply	380V 50Hz 9.37kw
Noise	≤75dBA
Overall dimensions	1850*1470*2080mm
Weight	2400kg
