

Double Head Liquid Filling Machine

Our double head liquid filling machine is made of all 304 stainless steel, and 316 stainless steel can also be customized. This machine has simple structure, high filling precision and convenient operation. This filling machine is widely used in liquid filling in food, daily chemical, pharmaceutical and other chemical industries.

Key components are imported from Germany and Taiwan. The best quality and after-sales service bring us the best reputation, welcome to contact us for more information.

Description

Rito machinery company's double head liquid filling machine is widely used all over the world, and many chemical and cosmetic factories are highly recommended to meet GMPs.

Feature:

1. The parts in contact with liquid are SUS316L stainless steel, and the rest are SUS304 stainless steel.
2. Simple operation, automatic completion of milk bottle, filling, bottle cap, bottle cap and bottle collection
3. PLC control, no bottle no filling, no bottle no cap, high precision (optional)
4. Magnetic torque screw cap, never fit into the regulation, screw cap torque is adjustable. It will not harm the bottle and cap
5. The whole machine meets GMP requirements and has passed CE certification.

Technical parameter:

Applied bottle	100ml-1L,500-5000ml
Production Capacity	35-50 bottles/minute for 2 nozzles
	60-80 bottles/minute for 4 nozzles
Filling type	Piston pump
Filling nozzle	2/4 high speed auto-sensed nozzles
Plug/cap nozzle	2/4 nozzles
Measuring accuracy	$<\pm 0.5\%$
Plugging rate	$\geq 99\%$
Capping rate	$\geq 99\%$
Air Source	0.3~04kfg/cm ²
Power Supply	220/380V 50/60Hz
Power	2/3.5KW
Machine size	2400*1200*2200mm
Weight	4800kg
