

## *KXP Linear Type Bottle Cleaning Machine*

This machine is the cleaning equipment in the oral liquid production line, which is mainly applied in the cleaning of straight tube bottle with 5 to 20 ml EPOL, Aluminum plastic combined lid (or safety lid). This machine transports the bottle by screw, and the bottles are double cleaned inside and outside with pressed recycled water, ionized water (or other washing Solution). Then blew off the left water with purified compressed air.

### **Technical Parameters**

Production capacity	4800 - 6000 bottles/hour
Applied bottle	10 ml - 20 ml, straight tube bottle
Pressed water consumption	0.5 m3/h
Purified compressed air consumption	0.4 m3/h
Power	2 KW
Power supply	AC,380V/50HZ 3 phase or customization
Overall size	2200 x 750 x 1500 mm
