

## VFL-6D Automatic Diving (Gravity) Liquid Filling Machine

VFL-6D Automatic Diving (Gravity) Liquid Filling Machine is special designed for 1-5L filling, aim to high foam, no sticking, no gas liquid filling. The max filling speed can reach 1000 bottles/hour (take 5L for test).

### Features:

1. This model is a gravity self flow filling machine.
2. This machine has function for compact structure, easy maintaining, easy assembly.
3. It is ideal equipment for wine with no viscosity, flavoring, pesticide, etc, which usually need to change specification.

### Technique Parameter:

|                                |   |
|--------------------------------|---|
| Machine Dimension: (L×W×H)     | 2000mm×900mm×2700mm                             |
| Machine Weight                 | 660Kg   |
| Diameter of Barrel             | ≥20mm (if < 20mm, that can be special designed) |
| Specification of Container     | Height: 80mm—320mm Diameter: 60mm—150mm         |
| Power Supply                   | AC 220V; 50Hz                                   |
| Power                          | 1.5 Kw  |
| Need equipped with Vacuum      | $6.67 \times 10^{-2}$ Air extract speed: 20L/S  |
| Filling error                  | 1000ml ≤ 2000ml ±1.0%                           |
|                                | > 2000ml ≤ 5000ml ±0.5%                         |
| Pneumatic (air-operated) sauce | 0.6 Mpa clean and stable compressed air         |
| Number of Filling Heads        | 6   |
| Production Capacity            | 1000 bottles/hour (take 5L for test)            |
