

GOLDEN LIN

Automatic Filling Machine GF-600

GF-600 is the in-line filler with fully automatic functions, comprising of 6 pieces of gear pump and can make a 0.9 liter output per second. In addition, GF-600 can be equipped with more gear module to meet higher demands of filling, if necessary. To make easy set-up and operation, GF-600 is controlled by human machine interface; what is more, GF-600 can replace piston or peristaltic module for the flexibility of filling demands.

Could be designed to be as 8 filling heads according to customer's required

Specifications:

Suits for liquid :	water--semi--viscous
Filling volume:	50-4000 ml
Capacity max :	60 bottles/min
Accuracy :	+/- 1%
Viscosity range under :	15,000 cps
	Driven gear pump or piston pump
Machine size :	(L)2200(W)1300(H)1450mm
Weights :	500 kgs
Power required :	100/110VAC or 200V~240V
