

Water Bottle Making Machine Plastic Q3000

The Q3000 bottle blowing equipment is importing the preform, and through the high-precision handle pick-and-place device, it can be servo-positioned, quickly and accurately put the handle in the mold, and then blow the bottle, so that the bottle body and the handle are fully integrated, and the bottle is fully handled.

The handle bottle automatic blow molding machine can greatly increase the output of the handle bottle under the premise of reducing labor, which has a profound impact on the PET edible oil bottle blow molding machine industry. This equipment is suitable for medium and large manufacturers who have high requirements on the output of handle bottles; customers who have low output requirements can choose the self-reliant semi-automatic blow molding machine YC-2L-2, which can also meet their needs.

Model	Q3000	
Bottle type specification	Cavity	2
	Theory output	3000-4000
	Max.volume	2L
	Bottle mouth maximum overall diameter	28-38mm
	Bottle biggest diameter	100mm
	Bottle maximum height	330mm
Power specification	Light tube quantity	16pcs
	Light tube power	1.5KW
	Maximum heating power	24KW
	All electric machine installation	27KW
	Actual consumption	40%--70%
Air pressure specification	Work pressure	7-9kg/cm ²
	Low-pressure gas consumption	1000L/min
	Blow bottle pressure	25-35kg/cm ²
	Higher -pressure gas consumption	3000Ltr/min
Air pressure specification	Work pressure	5-6kg/cm ²
	Temperature range	10℃
	Consumption	8000kcal/hr
	<u>Forzen</u> water flow	88L/min
Machine specification	Machine size	2.6x1.7x1.9
	Machine weight	2.5ton
