Semi Automatic Viscous Filling Machine

We specialize in deliver custom viscous filling machine that can be used to fill various products like bam, hot balm, wax, lip balm, cream etc in melting condition. We provide machines to fill viscous and semi viscous fluids in various types of containers. The machines are auto piston type that is rational in design. Our machines are popular providing disturbance free heavy duty performance and available at the most affordable rates.

Application

- Food Industry
- Paint Industry
- Cosmetics
- Any Semi Solid Material

Features

- Compact model.
- Very High Fill Accuracy.
- Minimum Change Over time.
- Variable AC frequency drive for speed adjustment.
- Minimum maintenance

Specification

- Filling Range* : - 50gm to 1000gm
- Output/Hour* : - 600 to 700 per hour
- Number Of Head / Syringe : - 1 Nos.
- Filling system : - Mechanically piston filling
