

MY-A03 Vertical Hand Filling Machine

Application

They are most commonly applicable for pharmaceuticals, daily chemicals, foodstuffs, cosmetics, pesticides and other industrial.

Typical application: Use for filling liquid and paste material, such as mineral water, cooking oils, juice, detergent, sauce, salad, butter & margarine, ketchup, jams, cream, honey, shampoos etc.

Features

- 1) Adopt manual operation does not need other power, simple operation, high filling precision;
- 2) Small, low cost;
- 3) Using 304 stainless steel construction of material contact parts, stainless steel valve system design;
- 4) Filling volume, filling speed can be adjustable, bottom close positive shutoff nozzles ensure drip free operations;
- 5) Extremely easy to clean and maintain;
- 6) Small footprint for simple bench mounting.

Technical Parameters:

| Model | MY-A02 |
|-------------------|---------------------------|
| Filling range | 5-50ml according to water |
| Hopper volume | 10L |
| Filling speed | 20-60pc/min |
| Filling precision | within 1% |
| Dimension | 27*27*70cm |
| Weight | 10kg |
