

Powder Filling Machine GF1803A

This machine is suitable for packing many kinds of powder, granule and so on. Mostly used in the daily life. For example, electuary, oatmeal, white granulated sugar, coffee, gourmet powder, condiment, milk powder, soybean milk powder, medicine powder, nettle, pepper and so on. This machine is fully automatic.

FEATURE:

- This machine can make bags, measure, unload, seal, cut, count, printing batch number according to customer's requirement automatically.
- It adopt advanced micro-computer control, driving stepper motor control the bag's length, stable performance, convenient adjustment, check correct.
- It adopt frequency stepless governor, and also with different of unloading mechanism for satisfying different granule, powder, sauce and liquid's package.

TECHNICAL DATA:

Making bag size: Width: 80-280 (mm) Length: 50-180 (mm)

Package speed: 30-90bags/minutes

Filling range: 5-150g

Power supply: 220v/50hz/ 1.5kw

Total machine weight: 350kg

Machine Outer shape size: Length 850mm*Width900mm*highth1850mm

FUNCTION:

The machine is mechanical and electrical integration, full English or Chinese show, adopt advanced micro-computer chip control photoelectric tracking struggle system and high precision stepper motor, keep material in the same situation of the bag. Control system will control the bag's length, filling location and speed. NC cutter can cut and count automatically in the scope of 1-99 bags. Automatic stop if lack paper. Automatic detection problems.
