

## ***GDX20-4 Filling Capping Machine (2-in-1)***

### **Function:**

The high-speed can sealer adopts one pressure head with one primary roll and secondary roll to realize double sealing, making operation more adjustable and able to assort with the filling machine. The drive of the filling machine is supplied by the machine, realizing the absolute stability of both machines. Now, the updated remote computer control system in this company can clearly reflect the equipment application situation of the users to ensure the comprehensive technical support for the appliers.

The machine is suitable for the isobaric filling and sealing of gas beverage in beer and beverage industries. Adopting world advanced machinery, electronics and pneumatic control technology, it has the features of stable filling, high speed, liquid level control, stable sealing, speed changing by frequency variation, low loss of materials. With optional remote control system, it is the ideal first-choice equipment of middle-sized beer and beverage factories.

### **Technical parameters:**

Filling Heads	20
Sealing Heads	4
Product Capacity	12000B/H ( 500ml )
Applicable Can Height	65 -160mm
Applicable Can Diameter	φ2.5 -83mm
Machine Power	5kw
