

Carbonated Easy Open Cans Filling-Capping 2 in 1 Machine

Product Description

1. This equipment is used for filling carbonated beverage in cans, such as beer, cola, energy drinks and soda water.
2. This equipment can be used for different material of cans, such as plastic, iron, aluminum and so on, and the different size of cans is allowed. We can design the equipment according to your requirements
3. It is applicable for equal pressure filler and capper of carbonated drinks in beer and drink industry.
4. It is a pop canned beer in the digestion and absorption of advanced foreign and domestic sealing machine on the basis of independent development of the can filling, sealing unit.
5. Filling and sealing is the overall designed, power system by filling sealing system to Ensure that both the absolute synchronization and coordination.
6. It adopts the advanced machine, electrical equipment, and Pneumatic control technology.
7. It has the characteristics of filling reposefully, high speed, liquid level control, capping reliably, frequency conversion timing, less material loss.
8. It can equip long-distance control system according to the Customers request.
9. It is the preferred equipment for the medium beer and beverage plant.
