

KL-160A Granular Vertical Automatic Packing Machine

Feature:

1. This machine is featured with compact structure, stable, easy operate, convenient on repairing.
2. This machine adopts photocell control system, visual and understandable, accurate positioning, nice looking.
3. This machine can finish automatically all processes, from measuring, filling, bag making, date-printing and finished productions conveyance.

Optional Parts:

1. SCM and step motor controller
2. Electromagnetic on-off control
3. Linked bags control device
4. Date printer with ribbon coder
5. Conveyor

Application:

Suitable for packing puffed food, fragile materials: potato chips, crispy rice, apple flakes, fruit jelly etc.

Tech data:

Item No	KL-160A
Film width	320mm
Film thickness	0.05-0.08mm
Bag length	30-200mm
Bag width	50-150mm
Measuring ranges	50-100ml
Film roll diameter	Max.300mm
Packaging speed	30-100bags/min
Power	220v,50HZ,2KW
Machine weight	350KG
Packaging film	OPP/CPP
