

Automatic Grain Packing Machine DXDK Series

Automatic vertical filling and closing machine series DXDK used for packing and easy-flowing products in the food, chemical, medical and other industries. As the packaging material may be used various combined heat sealable material, such as - cellophane / PE, paper / PE, BOPP / PE, aluminum foil / PE, Nylon / PE, and so forth.

The basic package includes a vertical packaging machine:

- one set of dimensional volumetric dosing cup components;
- one driver package;
- precision photo sensor;
- Control panel with English interface.

Additional options include: Time stamping, notch for easy opening of the package, the euro-punching, m-creasing (formation of side gusset), gas filling, made completely from stainless steel, and others.

On the instructions of the client device can generate a certain type of package: 3 or 4 suture package (sachet), packet-theft, etc.
