

Sleeve Labeling Machine

- This shrink sleeve labeling machine adopts international advanced technology; cover the circle label on the pet bottle.
- And then hot shrinking to fix on the position which bottle body designated.
- This machine's structure is compact, and suitable for the production line of different direction and different height.

Features:

Shrink sleeve labeling machine is a fully automatic intelligent packaging line that integrates the functions of bottle feeding, bottle separation, sleeve labeling and shrink labeling. The real high speed, precise positioning, manpower reduction and perfect packaging are the spirit of this equipment design. In the beverage and health food factory, it has the function of being beautiful, easy to clean and maintain.

Synchronous transmission mechanism, one transmission belt drive six sets of synchronous delivery axis drive, any drive belt can be completed within three minutes, compared with the traditional multi-layer arm type (replacement and maintenance takes more than six hours), easy maintenance, easy maintenance

Technical parameters:

Applicable Diameter of Bottle :	28mm~120mm
Applicable Length of Label:	30mm~250mm
Applicable Thickness of Label:	0.03mm~0.13mm
Applicable Internal Diameter of Paper Tube:	5"~10' (Adjustable)
Production Capacity :	150pcs/min
Input Power:	220V 50-60HZ
Dimension:	210*110*200cm
Weight:	400kg
